

TESTING

DAP

1. Check Protected Areas in DAP ContentResponder
2. Navigate to Digital Access Pass (DAP).
3. Click on Products>Manage.
4. Select the Product you want to check.

1. Click ContentResponder.
2. Select the page/post that you want to protect for that product.
3. Click on Protect Selected Pages/Posts

TESTING

1. Check Content of Every Page
2. Navigate to Pages.
3. Find the Protected Page and click Edit.

1. Check the content of the Page if it has the download links.

TESTING

1. Check Name of the Product Exactly Matching with JVZOO Product Name.
2. Navigate to Digital Access Pass (DAP).
3. Click on Products>Manage.
4. Select the Product you want to check.
5. Make sure that the Product Name is the same with JVZOO Product Name

JVZOO

1. Check Product Name Matching DAP Product Name
2. On your JVZOO Account, click on Sellers.
3. Find your product and click on Edit.

TESTING

1. Make sure that the Product Name is the same with DAP Product Name

1. Check Allow Sales & Marketplace Should be Yes
2. Make sure that Allow Sales and Show in Marketplace are set to Yes.

C. Check & Verify Price Points

D. Check – External Program Integration – It should have DAP IPN URL. If you missed this URL, JVZoo can't communicate with DAP. Customers cannot access membership area & products.

GetResponse:

1. Check – It should have Single optin

1. Check: Every lead is getting registered in getresponse.

(Note: Getresponse has issue with leadlinks optins. Sometimes we need to contact getresponse support to get specific campaign approved for api leads)

GotoWebinar:

1. Check – Webinar Registration link from GTW should match with webinar integration section in JVZOO.

SalesPage:

OTO1:

'No Thanks' link should lead to OTO2 sales page

OTO2:

'No Thanks' link should lead to No thanks links in 'buy buttons' sections.
